

Epidemics and PANDEMICS!

What is the difference between an epidemic and a pandemic?

You will be playing the online game pandemic 2.

- Play the game in “RELAXED” mode
 - Make sure to speed up the time so you have time to see some changes
-
1. What disease class did you pick and why?

 2. What symptom/symptoms does your disease have at first?

 3. In what country did your disease start?

 4. What characteristics might be helpful for your disease when starting in that country?

 5. What happens as your disease starts to spread?

6. Are you witnessing an epidemic or a pandemic?

7. What helps stop the spread of disease?

8. Closer to the end of the game are there any countries that remained healthy and why do you think they did?

9. What do you think is a good strategy to win the game?
